A Border Slave State Convention. We deem it highly Important that a Con-

rention of this sort be called, and called promptly. It is the desire of the Union men of the Border States, and it would be au unnatural proceeding for Kentucky to hold of our difficulties. The question now is with themselves, and what do they deem necessary to restore this Union to its integrity on a fair bosis, so that all can rejoin it without humiliation. It is important that these States hold counsel by themselves, without the interference of others, and publish to the world their own programme. On them reets to-dey the great duty of mediators a complete PORTABLE SNITHSMOP. here taken no rash or precipitete action; wiser than the men who made the Governany constitutional obligation. They have suffered more from the ill conduct of a port further South. They have rights in the Union. They have often spent their trea-sure and blood for it. They are not willing or ment? oure and blood for it. They are not willing ornment! to surrender their rights or the Union. They intend to have both, and it is right and proper that they, heving a deep interest and had no respect for them. A nest of

A radicel will promise conciliation, and compromise in general to get votes, when he will not be committed to anything, and the people who have to give their verdict will be in the dark on the meterlal point-what shall be done. We not just to our friends in the Free Stetes to below them, in such an event, to be taken at a disadventage.

We have now before the country different series of propositions—the Border State ones, the l'eace Conference propositions, tion will rise, will the Border Slave Status he satisfied with that, or what modifications do they think are better or necessary? We have noticed this puzzie to our friends

in the Free States, put at them by their opponents. Let us here some evidence that what we concede will accomplish the end, they asy; and come pledge themselves to go as far as our known friends to satisfy the Border States, who have stood firm in the storm Let us tell them definitely; so that this em barrassment will be out of the way. The Convention will have no power over

the people of Kentucky; over our lows, constitutions or courts. They will only state, by the authority of our people, when Kentucky and those identified in interest and feeling with her, think is needed in this eriees, for the information of those who will soon be ealied to act authoritatively and constitutionally on the gravest matter ever brought before a deliberate body, effecting the destiny of the vast millions that are hereafter to people this continent.

We publish this morning speeches made by two Republicans, at a Union Re publican meeting, at Indianapolis. We are constantly told that the North will concede nothing, that no just settlement can be effected, when the evidence to the contrary is abundant.

The North, like the South, has committed to the hands of extreme men the most vital interests-men who are interested in Disunion. They have done what the musses did not expect, and do not epprove. We make proof of it, and not a time far distant either. If the people of this country, with the common sense that has always morked their course, do not throw their representatives overboard, who stand in the way of a restoration of this glorious Union, then we have pleced too high on estimate on their sense. Seward said, "purties and platforms must be secrificed to the Union." Whether he desired it or not, he foretold what he foresew; and as obief adviser of the l'resi dent, he is acting on it. Read what these Republicans say to their own party friends, and say if they will not do. Remember that whilst they may lose a few irrepressibles of their own party; there is a mighty army of larged and liberal views would yet wrap patriotic efforts to restore the Union, in a worth while to point us to Washington or sophlo indifference. I From the India Sentinel. We harely alluded yesterday to the speeches made at the meeting of the con-pinckney, and Mr. Loundes, of South acryotive Republicans at the court house on Carolina, Mr. Elleworth and Mr. Sherman, Wednesday evening That the opinions expressed by the speekers would be reconded to by a large majority of the Reaid before that party, we have no doubt. The leaders, hungry for office, and in doubts as to the policy of the Administration haveing the dispensing of the losves and fishes, have held back, and will; but were the lesus of peace or wer-compromise or occreionsubmitted to the morees in Indiana that voted for Abrohom Lincoln, on overwhelm ing mejority would respond to the policy of preserving the government on the principles upon which it was formed—a compromise are as nothing to those asked to make now of conflicting opinions. The irrepressible element was not there, but their places were filled by men who have a stake in the country, and who believe that the world was not made exclusively for demagogues.

Mr. Howland first addressed the meeting

A National Convention were cured of compromise then; and they is a patent pill manufactory on a lorge scale

He did not believs there was a men in the house wha could explain the eighth resolution of that platform, the very resolution that men stick at now who oppose compromise. It starts out by asserting "that the normal condition of all the territory of the United States is that of freedom." What does that word normal meau? Does it meen that the elementary condition of the country, the lend, platform, the very resolution that men stick esession of the Government? If it means the last, it means what every man in the house and every men in the Union, of ordi nery intelligence, knows is not true. The territories purchased from France were not elequently to the Republicans who him to reflect upon the condition of the country, and besought them to uphold the cause of the Union. Concede to them. History, he said, would have no brighter page than the record of the labors of the Union men of the South who resisted a wild fenaticism at their very doors. We could not expect these men to coms up to ns on

He then reviewed the several proposition compromise, and pictured the horrors that would follow a civil war with an ex-tended frontier. Mr. Howland made many other strong oints, and enforced them with effect, one clesed with expressing a fervent hope that reason would triumph over passion in the adjustment of our national troubles, and

He was not a member the Republicon party-the porty now la power-and he felt that it was incumbent on that parly to stretch forth its hand to stay the egitation that was sweeping the land and threetening to destroy the best Government on earth. They were the source of power, and the President hed told them a few days ago, that, if the coun try was esved, they (the people) must save He had faith that the people would be true to themselves, true to the country, and would be found equal to the emergency The border States, North and South, were linked together by bonds of love, comity and strong effection, and it was in them that the true Union feeling must be looked for, and there it would be found. THEATER -The best audience we have seen this season, even on a benefit night. welcomed the return of our fair managerees, Mrs. Lorton, to the boards of the theater, after a long absence. The house was, as we predicted, crowded from parquette to dome, and well attested the appreciation of a Louisville public for the efforts Mrs Lorton has made throughout a long season for their entertainment. Miss Howard won additional plaudits for the excellent manner in which she personated the character of Mrs Chillington, in the "Morning Call," a part that eminently requires a lady to do well. The spectacle, "Cherry and Fair exact provision was made for the latter class, Star," was as well represented as we have seen anywhere, and the closing scene of the first set is a most excellent specimen of mechanical illusion. We wished we could have been on board that wonderful shipthe crestion of the fairy's power-laden with love and beauty. But the glympse of the glorious world we had will lighten the toils and troubles of many a weary day.

[o-morrow night the "funny man" takes his benefit, and though we wish to see another such a crowded house as that of last night, for his sake, we would advise all who desire to preserve their sides whole, to stay paralyzed. away, for surely Sidney Smith, who never said anything that was no funny, will certainly do his pretticet, and not to laugh will be impossible. The bill presented is a good one, embracing drama, farce and pantomime, with Miss Jennie in her most bewitching dances.

There was a tall house also at the Mozart Hall theater, and our German reporter is enthusiastic over the performance of last night. That Americans do not understand the language is no reason why they should s'ay away. The plays are well analyzed in English, and so well acted, that there is no difficulty in unlers; anding the plot, even to one who knows nothing of the language.

EFFECTS OF THE CRI-ts.-Comparatively faw know the abject condition, not to say the unmurmuring suffering, ln this city, produced by the present crop of desperate political knaves. And it is not alone in this city that those so lately happy and in a manner prosperous have been reduced to straitened circumstances. From all portions of the country, and particularly the ICE CREAMS AND SHERBETS manufacturing marts, comes the sad intelligence of the luroads of Misery and Want Wretched Care sits brooding upon the faces In the Senate there was a passage at arms of thousands but lately smiling, and the between Senator Cirsell, of Union, and my gaunt figure of hungry Want Intrudes his hideons form into the aboles and about the bearthstones of "the dear ones at home." What is to flow from all this, if not speedily arrested, God in mercy only knows. Ws msy conjecture, and shudder from the contemplation. There lies in store, in our county, and one of the ableat men in the Senate, offered the following resolutions. I mers political revolution. The father must clothe, and he must above all furnish food. the Democrat in several issues. I most for his family; his little ones counct and he will not let them s arve. What shall he do? He cannot get suployment, and yet the means must come. His limited credit may be expended, and his last loaf and his lasparticls of fuel consumed. We give our opinion, backed up by history, when we say that, having become reduced to the last cries for bread ever ringing in his cars, he will overturn and revolutionize the very founds tions of society! Reader, have you sontemresult of auffering in all ages and countries and is as certain as the law of accounty Every man ewes to his family that suste panes which nature demands, and the harriers of society will not stay the tids when

once it breaks its circumscribed banks, The orlsis has now continued for a period passing endurance, and still no real basis of compromise and settlement has been determined upon fully. Months, if not years, will be concumed in this manner, if a united and determined effort be not made, by all parties, for a settlement. Something must be done, or worse will follow. That is cor tain. The man of means may lose his fortune, and yet have a flattering world before him; but the law of self preservation is the first acknowledged in the human mind. Gentlemen: This afternoon was a great one with the Secessionists. The low-pressure oard, which you will please publish.

With a mowledge of the present unfortunate condition to which a great number of worthy mechanics and workmen have been reduced, why have the City Boards discontinued the programme of improvements long since indertaken? Why should the city add its nite to that heavy pressure under which the honest laboring masses are now crushed? Would it not, as a matter of economy, not men's wear to say of humanity, be far more proper that taxes, if necessary, were redoubled, and the HENRY DEPPEN, usual amount of work proceeded with: The burthen would thus fall lightly upon all, and great suffering, and it may be crime, NO. 507 MAIN STREET avoided Have our legislators nothing of the statesmanship or the mere shrewdness which characterized the first Napoleon ? The following, from an editorial in the Republican, is a very fair resume of the proceedings of the convention;

The voice of Missouri has a superscript that the provisions of the bill shall only apply to bona fide housekeepers. The voice of Missouri has been spoken through the convention called for that pur pose. That voice pronounced that further concessions should be made with a view to restoration of the Union of the States definitvely. Such concessions should have Crittenden's resolutions for their basis.

Mr. Trumbull opposed it, considering it gratuity, and as reform was needed it had better begin here. The resolution was

We are glad that Dr. Weaver has turned his attention to this class of diseases which have been so long neglected, and which have so rapidly increased in almost all parts of the world.
